DETAILED ACTION

Allowable Subject Matter

1. Claims 1,3,4, 7,9,13,15-21, and 25 are allowed. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or make obvious a motor controller comprising a plurality of switching units supplying AC power to a motor; plural brake resistors connected respectively to plural windings of the motor, a controller directly controlling selected ones of the switching units so that the power exhausted by the resistors corresponds to the motor speed, wherein the overcurrent consumed by the resistors is changed in proportion to a duty cycle of the switching units turned on and off by the controller.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They disclose various short circuit braking systems.
